Supporting Pupils at School with Medical Conditions

Some children in our school have medical conditions that require care and support to enable full access to education, including school trips and physical education. Some children with medical conditions may be disabled and where this is the case the school will comply with its duties under the Equality Act 2010. Some may also have special educational needs (SEN) and may have a Statement, or EHCP which brings together health and social care needs, as well as their special educational provision.

All children that have a medical condition that requires school staff to be aware will have a care plan produced for them by the class teacher, in consultation with the parent/guardian and child.

The care plan is updated at least once per year.

A copy of the care plan will be kept in the teachers Pupil information pack (PIP), which is located in the classroom. The PIP is audited throughout the year during observations and set dates to ensure that it is up to date and accurate.

A copy of the care plan is also kept in the school office, medical room (if required), staff room and child's inclusion file.

Details of the medical condition are recorded on to SIMS.

A file containing a copy of the care plans for all of the children will be kept in the staff room and also provided to the DRA in charge to ensure that all staff are aware of the conditions.

Class teachers are required to speak with the SENCO prior to organising a trip if children with SEND or medical conditions are in the class, to ensure that their needs are met.
